

5/15/79

Dear Phil,

If you hadn't identified the subject in the wild blue yonder picture I might have assumed, from all the hair, that it is Moses.

Quite a climb, and trip.

Spotlight is the ultra organ of the ultra Willis Garto. Who has gotten rich at right-wing politics and publishing. ^{Harty} Price is a writer who likes Garto's organ and apparently lives on it.

Doing whatever that requires.

From his prior support by a liberal foundation I never dreamed this.

I did not recall having informed you of the present medical situation and assumed you'd seen the only then current attention of that nature. Embattled, etc.

The consultant's report, delayed, reached the local doctor yesterday. I have an IVP on Friday. I know what it is but not what the "P" means. Depending on its results I go back on the coumadin, aka rat poison, Monday.

The one thing I can say for being off the stuff is that it relieves the limit of 3-4 drinks a day, to keep the changes to the blood in balance.

Enjoy what must be a wonderful trip and return safely.

Best,
